1.1.1 Non-text Content

A 2.0

- Images, image buttons, and image map hot spots have appropriate, equivalent <u>alternative text</u>.
- Images that do not convey content, are decorative, or contain content that is already conveyed in text are given empty alternative text (alt="") or implemented as CSS backgrounds. All linked images have descriptive alternative text.
- Equivalent alternatives to complex images are provided in context or on a separate linked page.
- Form buttons have a descriptive value.
- Inputs have associated <u>accessible names</u>.
- Embedded multimedia is identified via accessible text.
- Frames and iframes are appropriately <u>titled</u>.

Guideline 1.2

Provide alternatives for time-based media.

NOTE: If the audio or video is designated as an alternative to web content (e.g., an audio or sign language version of a web page, for example), then the web content itself serves as the alternative.

2.4.4 Link Purpose (In Context)

A 2.0

- The purpose of each link (or image button or image map hotspot) can be determined from the link text alone, or from the link text and its context (e.g., surrounding text, list item, previous heading, or table headers).
- Links with the same text that go to different locations are readily distinguishable.
- Fes una proposta de millora
 Afegir el link de l'imatge, indexar de manera correcta els check boxs, cambiar el atribut del titul
- L'eina no és infal·lible, creus que es tracta d'un fals positiu? Si és així justifica-ho. No crec que tot esta bé
